

WILDERHILL NEW ENERGY GLOBAL INNOVATION INDEX (NEX)

The NEX is a global index of 94 companies listed on 28 exchanges in 22 countries whose innovative technologies and services focus on the generation and use of cleaner energy, conservation, efficiency and the advancement of renewable energy in general.

The NEX Universe

Companies worldwide active in wind, solar, biofuels, hydro, wave and tidal, geothermal and other renewable energy businesses, as well as energy conversion, storage, conservation, efficiency, materials, pollution control, emerging hydrogen and fuel cells. 60 industry analysts are researching the NEX Index Components.

Index Methodology

NEX is a rule-based index and uses equal-weighting methodology modified by sector and market capitalization bands to provide diversification across the clean energy industry. The index is rebalanced quarterly on the last business day of March, June, September and December. At rebalancing no single component can exceed 5% weight.

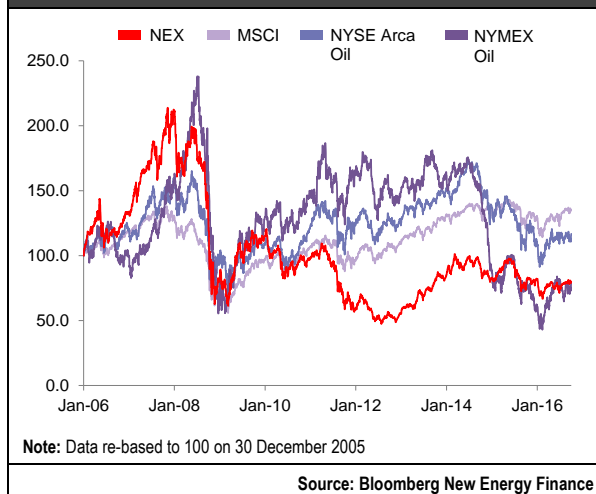

Eligibility Criteria for Index Constituents

- Listed on a national exchange or primary listing market
- Three-month average market capitalization of at least \$100 million and significant daily trading volume
- At least 50% of the stocks outside the U.S.
- Bias to pure plays

Index Calculation and Dissemination

The NEX is calculated by NYSE. The NEX closing values will be calculated on a 24-hour day that will end at 5:30 PM New York time. The end-of-day index calculations will use WM closing spot exchange rates as of 4 PM London time and each component stock's closing price on its primary market.

NEX vs MSCI World, NYSE Arca Oil and NYMEX Oil, 01 January 2006 – 30 September 2016

Index Tickers				
Tickers	USD	EUR	GBP	JPY
